

Xplornet Email on an Apple iOS 11 Device

Adding a new email account to your iOS 11 device to use with the Mail app:

1. From your Home Screen or the appropriate folder, select the **Settings** icon
2. Scroll down and choose **Accounts & Passwords**

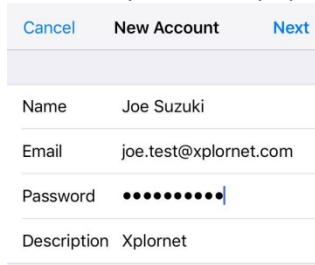

3. Under **Accounts**, choose **Add Account**
4. Choose **Other**

5. Under **Mail**, Choose **Add Mail Account**

6. Enter your **Name** as you want it to appear in the "From" section when sending email
7. Enter your full **Email** address, including the portion after the @ symbol (e.g., joe.test@xplornet.com)
8. Enter your email **Password**
9. Enter whatever you like in the **Description** field, or keep the auto populated value

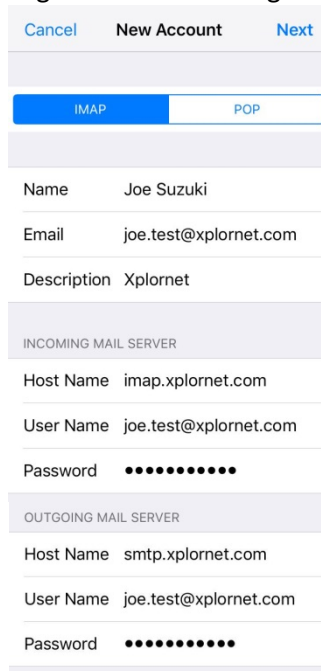

10. Select **Next**

11. If you entered your email address and/or password incorrectly, you will be presented with this error; otherwise continue with step 12:

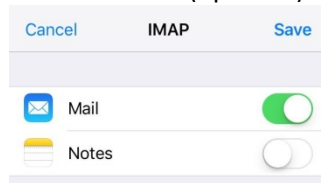

- a. Select OK
- b. Leave **IMAP** selected (highlighted in blue) – POP is an option but is not recommended

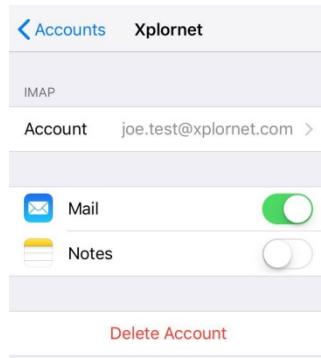

- c. Verify that your email address is correct in the **Email** and **User Name** fields, and correct if necessary. You will need to scroll down to see the **Outgoing Mail Server** settings

- d. Verify that the **Incoming Mail Server Host Name** is either **imap.xplornet.com**, or **imap.xplornet.ca** (if your email address ends in @xplornet.ca, @talkwireless.ca, @ciaccess.com or @southkent.net) – see the [settings page](#)
- e. Verify that the **Outgoing Mail Server Host Name** is either **smtp.xplornet.com**, or **smtp.xplornet.ca** (if your email address ends in xplornet.ca, @talkwireless.ca, @ciaccess.com or @southkent.net) – see the [settings page](#)
- f. If your email address was correct, re-enter your email **Password** in both the **Incoming Mail Server** and **Outgoing Mail Server** sections
- g. Select **Next**
12. You can choose to sync **Notes** as well or leave it unselected (optional)

13. Select **Save**
14. Under **Accounts**, select the one you just added (either by email address or the description you entered)
15. Under **IMAP**, select the **Account email address**

16. Scroll down and select **SMTP**

OUTGOING MAIL SERVER

SMTP smtp.xplornet.com >

Advanced >

23. Under **Mailbox Behaviors**, select each of **Drafts Mailbox**, **Sent Mailbox** and **Deleted Mailbox**, and verify that there is a **checkmark** against the appropriate folder under **On The Server** (not On My [iOS device]) and correct if necessary:

- a. Drafts Mailbox: **Drafts**
- b. Sent Mailbox: **Sent Items**
- c. Deleted Mailbox: **Trash**

24. Select < **Advanced** at the top after each Mailbox Behavior is verified

25. Scroll down and verify that **Use SSL is enabled (green)**, and enable it if not

26. Verify that the **Server Port** is **993** and correct if not

27. Select < **Account** at the top

28. Select **Done**

Your email account is now ready for use on your iOS device.

To Sync your [Webmail](#) Address Book Contacts to your iOS device

1. From your Home Screen or the appropriate folder, select the **Settings** icon
2. Scroll down and choose **Accounts & Passwords**

3. Under **Accounts**, choose **Add Account**
4. Choose **Other**

5. Under **Contacts**, select **Add CardDAV Account**

6. For **Server** enter **mail.xplornet.com**, or **mail.xplornet.ca** (if your email address ends in @xplornet.ca, @talkwireless.ca, @ciaccess.com or @southkent.net)

7. For **User Name** enter your **full email address**
8. For **Password** enter your **email password**
9. Enter whatever you like in the **Description** field. It will be auto-populated with what was entered in the Server field
10. Select **Next**
11. If it asks you **“What would you like to do with existing local contacts”** select **Keep on My [iOS device]**

If you wish to make your webmail Contacts as the **Default Contacts** on your iOS device, such that when you add a new contact on your iOS device, it will save it in your webmail Contacts too, do the following:

1. From your Home Screen or the appropriate folder, select the **Settings** icon
2. Scroll down and choose **Contacts**

3. Select **Default Account**

4. Select your **Contacts** account (either by the Description you have for it, or "My CardDAV Account" if you left the Description blank)

To Sync your [Webmail](#) Calendar to your iOS device

1. From your Home Screen or the appropriate folder, select the **Settings** icon
2. Scroll down and choose **Accounts & Passwords**

3. Under **Accounts**, choose **Add Account**
4. Choose **Other**

5. Under **Calendars** select **Add CalDAV Account**

- For **Server** enter **mail.xplornet.com**, or **mail.xplornet.ca** (if your email address ends in @xplornet.ca, @talkwireless.ca, @ciaccess.com or @southkent.net)

- For **User Name** enter your **full email address**
- For **Password** enter your **email password**
- Enter whatever you like in the **Description** field. It will be auto-populated with what was entered in the Server field
- Select **Next**

- Select **Save**

Changing your Email Password

If you **changed your email password** in [webmail](#), you will need to change it in Settings to match the new password.

For your **email account** in the **Mail app**:

- From your Home Screen or the appropriate folder, select the **Settings** icon
- Scroll down and choose **Accounts & Passwords**

- Under **Accounts**, select your **Mail** account (either by email address or the description you have for it)
- Under **IMAP** (or POP, if your account was previously setup that way), select the **Account email address**

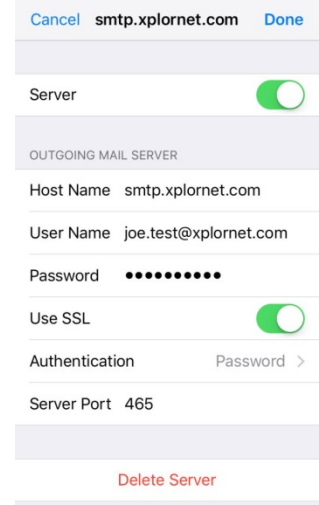

5. Under **Incoming Mail Server**, enter the new **Password** you set in webmail

6. Scroll down and select **SMTP**

7. Select the **Primary Server**

8. Under **Outgoing Mail Server**, enter the new **Password** you set in webmail

9. Select **Done**

10. Select **< Account** at the top

11. Select **Done**

For your **sync'd Webmail Contacts**:

1. From your Home Screen or the appropriate folder, select the **Settings** icon

2. Scroll down and choose **Accounts & Passwords**

- Under **Accounts**, select your **Contacts** account (either by the Description you have for it or “My CardDAV Account” if you left the Description blank)

- Enter the new **Password** you set in webmail and then select **Done**

- If you entered the password incorrectly, it will give this error:

- Select **Cancel** and then **OK**, and try entering the correct password again

- It will return to **Accounts & Passwords** once changed successfully

For your sync'd Webmail Calendar:

- From your Home Screen or the appropriate folder, select the **Settings** icon
- Scroll down and choose **Accounts & Passwords**

- Under **Accounts**, select your **Calendar** (or **Calendar, Reminders**) account (either by the Description you have for it or “My CalDAV Account” if you left the Description blank)

4. Select your **Account** under **CALDAV**

5. Enter the new **Password** you set in webmail and then select **Done**

a. If you entered the password incorrectly, it will give this error:

b. Select **Cancel** and then **OK**, and try entering the correct password again

6. It will return to **CALDAV** screen once changed successfully

Your password is now changed to match what you set it to in webmail.
